

ACCEPTED E.P.D.M. MEMBRANE SYSTEMS

Meeting CGSB 37-GP-52M & ASTM D 4637

Ethylene Propylene Diene Monomer (EPDM) membranes are categorized as thermoset membranes. Seams are solvent welded in combination with tapes. Adhesives and primers must be supplied by same manufacturer. EPDM is not accepted in Protected Membrane Designs (Inverted Roof Membrane Systems)

.1 Carlisle

- a) Fully adhered including 1.5mm (.060") thick Sure-White membrane b)
- b) Loose-laid ballasted
- c) Mechanically fastened

.2 Firestone

- a) Fully Adhered including 1.5 mm (.060") thick EcoWhite membrane b)
- b) Loose-laid ballasted
- c) Mechanically fastened

.3 Mule Hide

- a) Fully Adhered - 45/60/90 mil
- b) Loose-Laid and Ballasted – 45/60/90 mil
- c) Mechanically Fastened = 45/60/90 mil
