Technical Bulletin TB-2026-01

Revised Application Standards – Auxiliary Leveling Surface.

On January 27, 2026 the ARCA Warranty Ltd. Board of Directors accepted one revision and one addition to the ARCA Roofing Application Standards on the type and attachment method of the auxiliary leveling surface.

REVISED STANDARD

EPDM 3.2.1.4

MB 3.2.1.3

TP 3.2.1.4

The existing substrate type and condition will determine the auxiliary leveling surface type.

NEW STANDARD

EPDM 3.2.1.8

MB 3.2.1.5

TP 3.2.1.8

The attachment method of the auxiliary leveling surface may be determined by a building code requirement, wind-uplift design requirement or system replacement requirement.

Change will be referenced in the ARCA Roofing Application Standards Manual.
